

Case Study 3

The Client asked us to modernise this surgery, the clinicians were very exacting with their requirements for storage and their desire to have multiple sinks to aid their work flow. The suction equipment needed to be housed in its own unit and they wanted full size touch opening bins

Project

Refit existing Surgery with Gloss Anthracite Cabinetry from the Kabinets range with a Glacier white worksurface with double sink for the Nurse. Plenty of drawer storage was requested by the clinician so we delivered. The dental chair was only a few years old so was removed and refitted, we replaced the services to ensure they would last as long as the new surgery before fitting the new wood effect flooring. All building works, Flooring, Electrics, Plumbing, Cabinetry, Corian work tops and Project Management by SSD Building Services.

Project Value £11,000

Project Length: 6 Days
